

Soft beauties: watercolour pencils in pastel shades

Pastel is not everyone's cup of tea? These 12 soft shades prove creative hobby artists wrong. Their soft, highly pigmented 3.3 mm lead provides bright, lightfast colours. A unique property of these pens is that they allow for a full-surface, closed colour application in pastel, so that you can no longer see through the white paper structure. When used dry, they can be used for all the drawing techniques of a coloured pencil, and when used with a wet brush, they can be completely watercoloured - creating great effects. The new pastel pencils are available individually, in a metal case of 12 or together with 24 other colours in the Goldfaber Aqua gift set.

Goldfaber Aqua Pastel case of 12: **13,00 EUR**
available from June 2021
